

Run the TMPGEnc program.
Choose File>MPEG Tools from the menu.

1. Click on Merge & Cut at the top of the screen.
2. Click **“Add”** and browse and open each of the 2 files ie
c:\Sports Performer\Clips\Clip.mpg
And
C:\Sports Performer\Clips\Clip_02.mpg
3. Key into the “Output” field
C:\Sports Performer\Clips\FullClip.mpg
4. Click **“Run”**

This will add the 2 files into one new file in the Clips folder called FullClip.mpg.

You could now delete the original 2 files and rename the output file to something more meaningful
